

## **Category: Data Scientist**

Innovative Data Scientist with a passion for leveraging data to drive business impact. Proficient in Python, with experience in libraries such as TensorFlow, Keras, and PyTorch for deep learning applications. Skilled in exploratory data analysis, feature engineering, and model evaluation techniques. Led projects such as developing image classification models, building natural language processing pipelines, and implementing time series forecasting algorithms. Also contributed to projects including deploying machine learning models to production, optimizing hyperparameters for model performance, and conducting root cause analysis for business problems. Actively exploring emerging technologies such as reinforcement learning and federated learning to push the boundaries of data science.
